

LeasingOS

Powered by Raise

**One platform.
Endless possibilities.**

From short list to signed lease, take more control of the end-to-end leasing process with LeasingOS. JLL's comprehensive digital command center provides:

Transaction Management

- View curated property availabilities
- Centralize tour details and requests
- Tailor market research to your needs
- Communicate effortlessly with your JLL team in-app

Portfolio Management

- Track every lease, sublease, and flex contract
- Stay ahead with critical date alerts
- Navigate rent schedules easily
- Generate board-ready, comprehensive insights

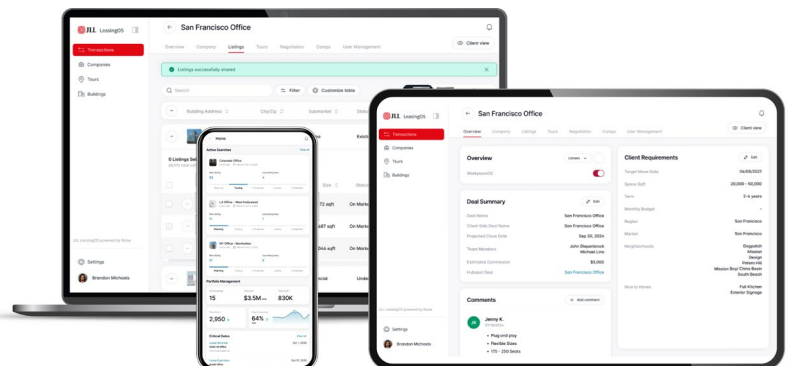

Workplace Analytics (premium)

- Integrate with HR and badge data seamlessly
- Tap into real-time, reliable usage metrics
- Uncover actionable employee trend insights
- Elevate your portfolio strategy with data-driven optimization

Experience the future of leasing with JLL's innovative technology, delivering faster results and clearer insights for your commercial real estate strategy.

Available in 2025 for Office properties in select markets
